

INSTALLATION GUIDE

Supermarket Crowd Analyzer — Installation Guide

Thank you for purchasing this project. Follow the steps to set it up.

1 ESP32-CAM Setup

1. Install Arduino IDE
 2. Install ESP32 board
 3. Open the file:
 esp32/camera_code.ino
 4. Edit:
 - WiFi SSID
 - WiFi Password
 - Backend server IP
 5. Upload to ESP32-CAM using FTDI
 6. Power using 5V after flashing
-

2 Backend Setup (Single app.py)

1. Install Python 3.8+
 2. Install dependencies:
 3. Place YOLO model in:
 models/yolov8n.pt
 4. Start server:
-

3 Dashboard

Open:
<http://:5000>

You will see:

- Live image
 - People count
 - Heatmap
 - Alerts
-

Troubleshooting

- YOLO error → model missing
 - ESP32 not sending → backend IP wrong
 - Dashboard blank → no snapshots yet
-
